

ESET22 SEMI-ELECTRIC PALLET TRUCK

The ESET22 semi-electric pallet truck is designed as an economic alternative to more expensive fully electric truck models. These units feature standard manual pallet truck style pumping operation for lifting and lowering loads, and self-propelled movement for easy transporting of goods.

Able to lift and transport loads up to 2,200 lbs. the ESET22 features:

- * ergonomically designed cushioned pump handle includes a safety reverse 'dead-man' button and forward/reverse buttons
 - * 3-position control handle (raise - neutral - lower)
 - * Quick Lift pump design only requires 5 pumps to reach maximum lift for loads under 200 kg. For loads over 200 kg it reverts to the normal 10-pump operation.
 - * full 90 degree top to bottom pumping action
 - * handle features 180 degree pivot steering action
 - * helper rollers for easy pallet exit and entry
 - * one piece heavy duty steel forks with tapered ends
 - * one piece greaseable hangers
 - * variable forward, reverse, drive, braking capabilities
 - * automatic neutral braking when throttle is released
 - * permanent stop when handle is positioned within 20 degrees of vertical or horizontal position
 - * 24 volt electrical system
 - * onboard charger plugs into any standard 110 volt outlet
 - * key switch
 - * battery discharge indicator
 - * polyurethane wheels for smooth ride & performance
 - * tandem rollers for increased stability on uneven floors
 - * stabilizer wheels under body ensures load stability

Specifications:

Capacity: 2,200 lbs.
Raised Height: 8"
Lowered Height: 3.3"
Pumps required to max. lift: 5 (loads under 200 kg)
Pumps required to max. lift: 10 (loads over 200 kg)
Individual Fork Width: 7"
Overall Fork Width: 20.5" or 27" O.D.
Fork Length: 48"
Overall Length: 69"
Overall Height: (top of handle): 48.5"
Turning Radius: 67"
Drive Wheel: 10" dia. Polyurethane
Tandem Load Rollers: 3" dia. Polyurethane
Travel Speed (with load): 1.6 - 2.4 mph
Battery Voltage: 24 volt (2 batteries)
Charger: 24 volt
Weight: 330 lbs.
